Synthetic cohort
(N = 1,200)
636 excluded:
300 did not meet the inclusion criteria:
- 300 missing
336 met the exclusion criteria:
- 156 Patients with age below 18
- 180 Patients with age below 18
Patients included for analysis
(N = 564)
A
(N = 282)
B
(N = 282)
Model development
Clinical variables and extended marker models
Validation
Independent cohorts and sensitivity analyses
Interpretation
Model explanation and robustness checks
