

get_score: complete-call runtime

One joint Age + Sex + Race model | survival: 100 time points | 1 thread per call

Logistic Cox Fine-Gray

R = 0 bars: observed min-max, not confidence intervals. R = 100 triangles/arrows: stopped after 30 min; lower bounds only.
Lines connect completed conditions only. Independent conditions could run concurrently; these are not strict R = 100 / R = 0 ratios.
